| Refrigerant leakage contributes to climate change. Refrigerant with lower global warming potential (GWP) would contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 3. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 3 times higher than 1 kg of CO ₂ , over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional. | |
| Cooling Mode | |
| Energy Efficiency Ratio (EER) | 2,6 |
| Energy Efficiency Class | A |
| Hourly electricity consumption | Energy consumption 1,5 kWh per 60 minutes, based on standard test results. Actual energy consumption will depend on how the appliance is used and where it is located. |
| Cooling capacity | 3,8 kW |
